CAREER OBJECTIVE

To work as a Java Backend Developer where I can apply my Spring Boot and backend skills to build scalable enterprise applications and grow as a Java Engineer.

SUMMARY

Java Developer with strong expertise in Core Java, Spring Boot, Hibernate, and RESTful API development. Experienced in designing and developing scalable backend systems including E-Commerce, News Portal, and LMS applications. Skilled in building secure, high-performance, and maintainable applications using MVC architecture and clean code practices.

WORK EXPERIENCE

Ducat IT Training School — Noida Sec-62

Nov 2023 – Jun 2024

- Completed Java Backend Development training program
- Gained hands-on knowledge in Java, Spring Framework, Spring Boot, Hibernate, and REST APIs
- Built understanding of backend development, database systems, and enterprise application structure
- Prepared for roles: Java Developer, Spring Boot Developer, Backend Developer

Boolment Software Pvt. Ltd., Gurugram

Jun 2024 – Nov 2024

- Worked as Software Development Intern on enterprise-level Java applications
- Contributed to backend development using Java, Spring Boot, and RESTful APIs
- Developed scalable and maintainable backend services
- Followed industry best practices and MVC architecture

Zidio Development — Remote

Jan 2025 – Mar 2025

- Worked as Web Development Intern (Frontend Development)
- Designed and developed responsive websites using HTML, CSS, JavaScript, and Bootstrap
- Focused on UI design, responsiveness, and user experience

SKILLS

Programming Language:	Java
Core Concepts:	OOPs, Collections, Exception Handling, Multithreading
Backend Technologies:	JDBC, JSP, Hibernate
Spring Framework:	Spring Core, Spring Boot, Spring MVC, Spring Data JPA, Spring Security
API Development:	REST APIs, JSON, HTTP Methods, Postman
Databases:	MySQL, MongoDB
Tools:	Git, GitHub, Maven, Docker (Basics)
Frontend:	HTML, CSS, Bootstrap, Thymeleaf
Architecture:	MVC Pattern, Microservices (Basic Understanding)
Security:	Spring Security, Authentication & Authorization

PROJECTS

1. E-Commerce Backend System (Java, Spring Boot, MySQL)

Developed a scalable backend system for an e-commerce platform using Java, Spring Boot, and MySQL. The system supports product management, user authentication, cart functionality, and order processing with secure RESTful APIs.

Key Features:

- User Registration and Authentication (Spring Security)
- Product Management (Add, Update, Delete Products)
- Shopping Cart and Order Management
- Role-based Access Control (Admin/User)
- RESTful APIs for frontend integration
- MySQL database with Spring Data JPA
- Secure and scalable backend architecture

2. News Portal Application (Java, Spring Boot, MySQL)

Built a dynamic news management system where admins can manage news articles across multiple categories. The system provides REST APIs for creating, updating, deleting, and filtering news efficiently.

Key Features:

- Category-wise News Management (Sports, Technology, World, etc.)
- Admin Dashboard for CRUD operations
- RESTful API Integration
- Search and Filtering Functionality
- MySQL-based Data Storage

3. Learning Management System (LMS) (Java, Spring Boot, MongoDB)

Developed a full-stack Learning Management System using Spring Boot and MongoDB for managing courses, users, and enrollments. Designed scalable NoSQL architecture for flexible data handling.

Key Features:

- User and Role Management (Admin/Student)
- Course Creation and Enrollment System
- REST APIs using Spring Boot
- MongoDB Integration for flexible data storage
- Scalable backend architecture

EDUCATION

2018 – 2020	Polytechnic Diploma (Computer Science) Government Polytechnic College, Jodhpur	GPA: 8.4
2021 – 2024	Bachelor’s Degree (B.Tech) Bikaner Technical University (BTU), Bikaner	GPA: 8.6
2018	Class 10th (RBSE) First Division
